Description	A pan head machine screw with a free-spinning lock-washer and flat washer manufactured as one assembly.	
Applications/Advantages	The washer/screw assembly makes this a locking screw with the helical washer providing the locking action and flat washer distributing the load over a wider area.	
Material	Steel	Stainless
	<i>Steel Screws</i> -- AISI 1006 - 1022 or equivalent steel. <i>Steel Washers</i> -- Split-lock: SAE 1060 carbon steel; Flat washer: SAE 1008 carbon steel.	<i>Stainless Screws</i> -- Class 304 stainless. <i>Stainless Washers</i> -- Class 304 stainless
Hardness	<i>Steel Screws</i> -- Rockwell B70 - B100 (Unhardened). <i>Steel Washers</i> -- Split-lock: Rockwell C38 - 46; Flat washer: Unhardened	
Tensile Strength	<i>Steel</i> : 60,000 psi. minimum. No. 4 SEMS screws shorter than 1/2" are not subject to tensile testing. SEMS screws of diameters No. 6 to 10 inclusive, which are shorter than 1/2" or 3D (where D is the nominal screw size in inches) are not subject to tensile testing.	
Plating	See Appendix-A for information on the plating of steel SEMS.	Stainless sems are usually supplied with plain finish
